PROFESSIONAL SUMMARY

Senior Backend Engineer with 12+ years of experience designing, building, and scaling distributed Java and Spring Boot systems for fintech, e-commerce, and logistics platforms. Deep expertise in microservices architecture, high-throughput REST/event-driven APIs, database performance tuning, and leading engineering teams through cloud migrations. Proven track record of taking systems from 10K to 5M+ daily active users while cutting infrastructure cost and P99 latency.

TECHNICAL SKILLS

Languages: Java (8-21), Kotlin, SQL, Python (scripting)

Frameworks: Spring Boot, Spring Cloud, Spring Security, Spring Batch, Hibernate/JPA, gRPC

Messaging: Apache Kafka, RabbitMQ, AWS SQS/SNS

Databases: PostgreSQL, MySQL, MongoDB, Redis, Cassandra

Cloud & DevOps: AWS (EC2, ECS, Lambda, RDS, S3), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions

Architecture: Microservices, Event-Driven Design, Domain-Driven Design, CQRS, Saga Pattern, API Gateway

Observability: Prometheus, Grafana, ELK Stack, Datadog, Distributed Tracing (Zipkin/Jaeger)

Practices: TDD, CI/CD, Code Review, System Design, Mentoring, Agile/Scrum

PROFESSIONAL EXPERIENCE

Principal Backend Engineer

FinEdge Technologies Pvt Ltd, Bengaluru | Jan 2021 - Present (4.5 yrs)

- Lead a team of 9 backend engineers building the core payments and settlement platform processing 5M+ transactions/day across microservices written in Java 17 and Spring Boot 3.
- Redesigned the ledger service using event sourcing and Kafka, reducing reconciliation errors by 92% and cutting P99 latency from 850ms to 140ms.
- Architected a multi-region active-active deployment on AWS (ECS + RDS Aurora), improving uptime from 99.5% to 99.97%.
- Introduced Spring Cloud Gateway and service mesh patterns to standardize auth, rate-limiting, and observability across 40+ microservices.
- Drove adoption of contract testing (Pact) and TDD, reducing production incidents caused by breaking API changes by 70%.
- Mentored 6 mid-level engineers into senior roles; ran the internal 'Backend Guild' technical review process.

Senior Software Engineer (Backend)

Vertex Commerce Solutions, Chennai | Jun 2016 - Dec 2020 (4.5 yrs)

- Built the order-management and inventory microservices for a D2C e-commerce platform scaling from 50K to 2M monthly active users.
- Migrated a monolithic Spring MVC application to Spring Boot microservices, decreasing deployment time from 2 hours to under 10 minutes via Jenkins CI/CD.
- Designed a distributed caching layer with Redis that reduced database read load by 65% during peak sale events.
- Implemented Kafka-based event pipelines for real-time inventory sync across 12 regional warehouses.
- Optimized PostgreSQL queries and indexing strategy, cutting average API response time by 45% on the catalog service.

Software Engineer

NimbusLogic Systems, Chennai | Aug 2013 - May 2016 (2.8 yrs)

- Developed REST APIs in Spring Boot for a logistics tracking platform used by 200+ enterprise clients.
- Built JWT-based authentication and role-based access control (RBAC) for the internal admin portal.
- Wrote unit and integration tests (JUnit, Mockito) achieving 85%+ code coverage on core modules.
- Collaborated with QA to set up automated regression suites, reducing manual testing effort by 30%.

EDUCATION

B.E. in Computer Science — Anna University, Chennai (2009 - 2013)

CERTIFICATIONS

AWS Certified Solutions Architect - Professional | Certified Kubernetes Administrator (CKA) | Spring Professional Certification
